

Three Cylinder Intercooler Upgrade

Advantages

- Stainless steel construction
- Approximate 240 lb weight reduction
- Improved maintenance access
- Easy to install
- Can be field retrofitted
- Kit fits on all WLN and WBO compressors
- Kit includes all components for installation

Cast Iron Intercooler Unit

Unit with Intercooler Upgrade

GD Product Innovation at Work

GD
GARDNER DENVER™

Experience Proven Results™

Benefits

- Improved locomotive fuel economy due to 240 lb weight reduction
- Improves service access to the compressor inside the locomotive saving time and money
- Less parts to stock and maintain in inventory
- Stainless steel construction of the intercooler improves corrosion resistance
- No gaskets are used in construction of intercooler which eliminates a potential water leak path
- Replacement of the upgrade intercooler in the locomotive is fast and easy resulting in time and money savings
